INDEX

Acetaldehyde, production of, during the anaerobic fermentation of glucose by *B. coli communis* (Grey) 359
Adamkiewicz test for protein, Hopkins & Cole modification of (Mottram) 249
Adams, A. *see* Moore, B.
Agashe, G. S. *see* Weizmann, C.
Aldehydes, aromatic, condensation of with Pyruvic acid (Lubrzynska and Smedley) 375
Amylase, behaviour of in presence of a specific precipitate (Porter) 599
Analysis, capillary, quantitative relations in (Schmidt) 231
Antirrhinum Majus, flower pigments of (Wheldale and Bassett) 87, 441
Atkins, W. R. G. and Wallace, T. A. Critical solution point of Urine 219

Barcroft, J. Combinations of Haemoglobin with Oxygen and with Carbon Monoxide 481
Barendrecht, H. P. Enzyme action, facts and theory 549
Barger, G. and Ewins, A. J. Identity of Trimethylhistidine (Histidine-Betaine) from various sources 204
Bassett, H. L. *see* Wheldale, M.
Birds, preparation from animal tissues of substance which cures polyneuritis in (Cooper) 268
Blood, lipolytic action of the (Thiele) 275
Blood, modification of Teichmann's test for (Symons) 596
Brahmachari, U. N. Investigation into the physico-chemical mechanism of haemolysis by specific haemolysins 562
Brain, fatty acids of human (Grey) 148
Brain, galactosides of the (Rosenheim) 604

Cameron, A. T. Iodine content of fish-thyroids 466
Capillary analysis, quantitative relations in (Schmidt) 231
Carbon monoxide, combinations of haemoglobin with (Hill, Barcroft) 471, 481
Carboxylase (Harden) 214
Caseinogen, clotting of solutions of (Schryver) 568
Cathcart, E. P. and Green, H. H. Rate of protein catabolism 1
Cell-division, in hyacinths, influence of rare earths on (Evans) 349
Chemistry of the Leucocytozoon Syphilidis (McDonagh and Wallis) 517
Chick, H. Factors concerned in solution and precipitation of Euglobulin 318
Chick, H. and Martin, C. J. Density and solution volume of some proteins 92
—— —— Precipitation of egg-albumin by Ammonium Sulphate 380, 548
Cholesterol, content of tissues of cats (Gardner and Lander) 576
Classification of the sterols (Dorée) 616
Clotting of caseinogen solutions (Schryver) 568
Clotworthy, H. R. S. *see* Thompson, W. H.
Colour reaction with phosphotungstic and phosphomolybdic acids, chemical nature of substances from alcoholic extracts of various foodstuffs which give a (Funk and Macallum) 356
Colour reactions of certain indole derivatives (Homer) 116
Cooper, E. A. Preparation from animal tissues of substance which cures polyneuritis in birds 268
—— Relations of the Phenols and their derivatives to proteins 175, 186
Coprostanone, oxidation of (Gardner and Godden) 588
Coprosterol, oxidation of (Gardner and Godden) 588
Coprosterol (Dorée) 616
Creatine and Creatinine, use of Folin method for estimation of (Thompson, Wallace, and Clotworthy) 445
Cystine and Tyrosine, separation of (Plimmer) 311

Density, of some proteins (Chick and Martin) 92
Diastatic enzymes, influence of salts on rate of hydrolysis of glycogen by (Norris) 622
Diets, influence of, upon growth (Hopkins and Neville) 97
Dorée, C. Isocholesterol, coprosterol and the classification of the sterols 616

Eaves, E. C. *see* Plimmer, R. H. A.
Echinoderms, rôle of Glycogen, Lecithides, and Fats in the reproductive organs of (Moore, Whitley and Adams) 127
Echinus esculentus, basic and acidic proteins of sperm of (Moore, Whitley and Webster) 142
Egg-albumin, precipitation of by Ammonium Sulphate (Chick and Martin) 380, 548
Enzyme action (Barendrecht) 549
Enzymes of washed zymin and dried yeast (Harden) 214
Euglobulin, factors concerned in solution and precipitation of (Chick) 318
Evans, W. H. Influence of carbonates of rare earths (Cerium, Lanthanum, Yttrium) on growth and cell-division in hyacinths 349

Ewins, A. J. *see* Barger, G.
—— and Laidlaw, P. P. Fate of Indolethylamine in the organism 18

Fat, of yeast (Neville) 341
Fats, rôle of in the reproductive organs of Echinoderms (Moore, Whitley and Adams) 127
Fatty acids, biochemical synthesis of (Smedley and Lubrzynska) 364
Fatty acids of human brain (Grey) 148
Fermentation of Glucose by *B. coli communis*, production of Acetaldehyde during the (Grey) 359
Fermentation, rate of, by growing yeast cells (Slator) 197
Folin method, use of for estimation of Creatine and Creatinine (Thompson, Wallace and Clotworthy) 445
Foodstuffs, chemical nature of substances from, which give colour reactions with phosphotungstic and phosphomolybdic acids (Funk and Macallum) 356
Funk, C. Estimation of vitamine-fraction in milk 211
—— Nitrogenous constituents of lime-juice 81
—— and Macallum, A. B. On the chemical nature of substances from alcoholic extracts of various foodstuffs which give a colour reaction with phosphotungstic and phosphomolybdic acids 356

Galactosides, of the brain (Rosenheim) 604
Gardner J. A. and Godden, W. Oxidation of coprosterol and coprostanone 588
—— and Lander, P. E. Cholesterol content of the tissues of cats under various dietetic conditions and during inanition 576
Gas-electrode for general use (Walpole) 410
Germicidal properties of phenols (Cooper) 175
Globulins, separation of (Haslam) 492, 636
Glycogen, hydrolysis of, by diastatic enzymes (Norris) 26
Glycogen, influence of salts on rate of hydrolysis of by diastatic enzymes (Norris) 622
Glycogen, rôle of in the reproductive organs of Echinoderms (Moore, Whitley and Adams) 127
Glyoxylic reaction, significance of colour reaction of certain indole derivatives with regard to (Homer) 116
Godden, W. *see* Gardner, J. A.
Green, H. H. *see* Cathcart, E. P.
Grey, E. C. Fatty acids of human brain 148
—— Production of acetaldehyde during the anaerobic fermentation of Glucose by *Bacillus coli communis* 359
Growth, influence of diets upon (Hopkins and Neville) 97
Growth, of hyacinths, influence of rare earths on (Evans) 349

Haemoglobin, combinations of, with Oxygen and with Carbon monoxide (Hill, Barcroft) 471, 481
Haemolysis, physico-chemical mechanism of, by specific haemolysins (Brahmachari) 562
Harden, A. Enzymes of washed zymin and dried yeast. Carboxylase 214
—— and Young, W. J. Enzymatic formation of polysaccharides by yeast preparations 630
Haslam, H. C. Separation of Proteins. Globulins 492, 636
Hewitt, J. A. Metabolism of nitrogenous sugar derivatives 207
Hill, A. V. Combinations of Haemoglobin with Oxygen and with Carbon monoxide 471
Histidine-Betaine, identity of, from various sources (Barger and Ewins) 204
Histone, osmotic pressure of a, direct measurement of (Moore, Whitley and Webster) 142
Homer, A. Colour reactions of certain indole derivatives 116
—— Condensation of Tryptophane and other indole derivatives with certain aldehydes 101
Hopkins and Cole modification of Adamkiewicz test for Protein (Mottram) 249
Hopkins, F. G. and Neville, A. Influence of diets upon growth 97
Hyacinths, influence of carbonates of rare earths on growth and cell-division in (Evans) 349
Hydrogen Chloride, hydrolysis of proteins with alcoholic solution of (Weizmann and Agashe) 437

Indole derivatives, colour reactions of certain (Homer) 116
Indole derivatives, condensation of with certain aldehydes (Homer) 101
Indolethylamine, fate of, in the organism (Ewins and Laidlaw) 18
Iodine content of fish-thyroids (Cameron) 466
Isocholesterol (Dorée) 616

Laidlaw, P. P. *see* Ewins, A. J.
Lander, P. E. *see* Gardner, J. A.
Lecithides, rôle of in the reproductive organs of Echinoderms (Moore, Whitley and Adams) 127
Leucocytozoon Syphilidis, chemistry of (McDonagh and Wallis) 517
Lime-juice, nitrogenous constituents of (Funk) 81
Lipolytic action of the blood (Thiele) 275
Lipolytic action of the tissues (Thiele) 287
Litmus paper, use of as a quantitative indicator of reaction (Walpole) 260
Lubrzynska, E. and Smedley, I. Condensation of aromatic aldehydes with pyruvic acid 375
Lubrzynska, E. *see* Smedley, I.

Macallum, A. B. *see* Funk, C.
McDonagh, J. E. R. and Wallis, R. L. M. Chemistry of the Leucocytozoon Syphilidis 517
MacLean, I. Smedley. Estimation of pyruvic acid 611

MARTIN, C. J. *see* CHICK, H.
Metabolism of nitrogenous sugar derivatives (Hewitt) 207
Metabolism of organic phosphorus compounds (Plimmer) 43
Milk, estimation of vitamine-fraction in (Funk) 211
MILROY, J. A. Some observations on the estimation of Urea 399
MOORE, B., WHITLEY, E. and ADAMS, A. Rôle of Glycogen, Lecithides, and Fats in reproductive organs of Echinoderms 127
—— —— and WEBSTER, A. Basic and acidic proteins of sperm of *Echinus esculentus*. Osmotic pressure of a protamine or histone 142
MOTTRAM, V. H. Hopkins and Cole modification of Adamkiewicz test for protein 249

NEVILLE, A. The fat of yeast 341
—— *see* HOPKINS, F. G.
Nitrogenous constituents of lime-juice (Funk) 81
Nitrogenous sugar derivatives, metabolism of (Hewitt) 207
NORRIS, R. V. Hydrolysis of Glycogen by diastatic enzymes 26
—— Influence of salts on the rate of hydrolysis of glycogen by diastatic enzymes 622

Osmotic pressure of a protamine or histone, direct measurement of (Moore, Whitley and Webster) 142
Oxygen, combinations of haemoglobin with (Hill) 471
Oxygen, combinations of haemoglobin with (Barcroft) 481

PAGE, H. J. *see* PLIMMER, R. H. A.
Palmitic acid, some esters of (Stephenson) 429
Phenols, effect of various factors upon germicidal and protein-precipitating powers of (Cooper) 175
Phenols and their derivatives, relations of, to proteins (Cooper) 175, 186
Phosphorus compounds organic, hydrolysis of by dilute acid and by dilute alkali (Plimmer) 72
Phosphorus compounds organic, metabolism of (Plimmer) 43
Phosphotungstic and phosphomolybdic acids, chemical nature of substances from alcoholic extracts of various foodstuffs which give a colour reaction with (Funk and Macallum) 356
Phytin, investigation of (Plimmer and Page) 157
Pigments, flower, of *Antirrhinum Majus* (Wheldale and Bassett) 87, 441
PLIMMER, R. H. A. Hydrolysis of organic phosphorus compounds by dilute acid and by dilute alkali 72
—— Metabolism of organic phosphorus compounds 43
PLIMMER, R. H. A. Separation of Tyrosine and Cystine 311
—— and EAVES, E. C. Estimation of Tyrosine in proteins by bromination 297
—— and PAGE, H. J. Investigation of Phytin 157
Polyneuritis in birds, preparation from animal tissues of substance which cures (Cooper) 268
Polysaccharides, enzymatic formation of by yeast preparations (Harden and Young) 630
PORTER, A. E. Behaviour of Amylase in presence of a specific precipitate 599
Precipitation of egg-albumin by Ammonium Sulphate (Chick and Martin) 380, 548
Protamine, osmotic pressure of a, direct measurement of (Moore, Whitley and Webster) 142
Protein catabolism, rate of (Cathcart and Green) 1
—— Hopkins and Cole modification of Adamkiewicz test for (Mottram) 249
Proteins, basic and acidic, of sperm of *Echinus esculentus* (Moore, Whitley and Webster) 142
—— chemical action of quinone upon (Cooper) 186
—— density and solution volume of some (Chick and Martin) 92
—— estimation of Tyrosine in, by bromination (Plimmer and Eaves) 297
—— hydrolysis of, with alcoholic solution of Hydrogen Chloride (Weizmann and Agashe) 437
—— precipitating power of phenols for (Cooper) 175
—— relations of Phenols and their derivatives to (Cooper) 175, 186
—— salting-out of (Chick and Martin) 380
—— separation of (Haslam) 492, 636
Pyruvic acid, condensation of aromatic aldehydes with (Lubrzynska and Smedley) 375
Pyruvic acid, estimation of (MacLean, I. Smedley) 611

Quinone, chemical action of upon proteins (Cooper) 186

Rare earths, influence of carbonates of, on growth and cell-division in hyacinths (Evans) 349
Reaction, use of litmus paper as a quantitative indicator of (Walpole) 260
ROSENHEIM, O. Galactosides of the brain 604

Salting-out of proteins (Chick and Martin) 380
Salts, influence of, on rate of hydrolysis of glycogen by diastatic enzymes (Norris) 622
SCHMIDT, H. Quantitative relations in capillary analysis 231
SCHRYVER, S. B. Notes on some further experiments on the clotting of caseinogen solutions 568

Slator, A. Rate of fermentation by growing yeast cells 197
Smedley, I. and Lubrzynska, E. Biochemical synthesis of fatty acids 364
—— *see* Lubrzynska, E.
Solution-volume, of some proteins (Chick and Martin) 92
Stephenson, M. Some esters of Palmitic acid 429
Sterols, classification of (Dorée) 616
Sugar derivatives, nitrogenous, metabolism of (Hewitt) 207
Symons, C. T. Modification of Teichmann's test for blood 596
Synthesis of fatty acids, biochemical (Smedley and Lubrzynska) 364

Teichmann's test for blood, modification of (Symons) 596
Thiele, F. H. Lipolytic action of the blood 275
—— Lipolytic action of the tissues 287
Thompson, W. H., Wallace, T. A. and Clotworthy, H. R. S. On the use of the Folin method for estimation of Creatine and Creatinine 445
Thyroids, fish, iodine content of (Cameron) 466
Tissues, lipolytic action of (Thiele) 287
Trimethylhistidine (Histidine-Betaine) from various sources, identity of (Barger and Ewins) 204
Tryptophane, condensation of with certain aldehydes (Homer) 101
Tyrosine, and Cystine, separation of (Plimmer) 311
Tyrosine, estimation of in proteins by bromination (Plimmer and Eaves) 297

Urea, estimation of (Milroy) 399
Urine, critical solution point of (Atkins and Wallace) 219

Vitamine-fraction, estimation of in milk (Funk) 211

Wallace, T. A. *see* Atkins, W. R. G. and Thompson, W. H.
Wallis, R. L. M. *see* McDonagh, J. E. R.
Walpole, G. S. Gas-electrode for general use 410
—— Use of litmus paper as a quantitative indicator of reaction 260
Webster, A. *see* Moore, B.
Weizmann, C. and Agashe, G. S. Hydrolysis of proteins with alcoholic solution of Hydrogen Chloride 437
Wheldale, M. Flower pigments of *Antirrhinum Majus*. Method of preparation 87
—— and Bassett, H. L. Flower pigments of *Antirrhinum Majus*. (2) The pale yellow or ivory pigment 441
Whitley, E. *see* Moore, B.

Yeast cells, growing, rate of fermentation by (Slator) 197
Yeast, dried and washed, enzymes of (Harden) 214
Yeast, enzymatic formation of polysaccharides by preparation of (Harden and Young) 630
Yeast, the fat of (Neville) 341
Young, W. J. *see* Harden, A.

Zymin, washed, enzymes of (Harden) 214
